Pre-arranged Trades or Block Trades

MEFF

April 2023

**Contract group: Energy Derivatives**

**Date: 27 March February 2023**

**Effective Day: 03 April 2023**

**Replaces: I-EX-ENE-01/2023**

**This Instruction sets out the principles applicable to acceptance of Pre-arranged Trades or Block Trades, the operating procedure and the timetable. It is modified due to the Update of the reference parameters.**

## **1. PRINCIPLES FOR THE ACCEPTANCE OF PRE-ARRANGED TRADE**

The basic principle governing the acceptance of Prearranged Trades is that its price is a market price. In the event that the Prearranged trade is on a liquid contract, it has a volume that is below the thresholds established by ESMA for that contract, and none of the counterparties reduce risk with the trade, the trade will be carried out through the Volume Action modality.

The thresholds established by ESMA are the so-called Large in Scale (LIS-PRE-TRADING), defined by asset class and underlying class in nominal.

MEFF and BME CLEARING will supervise any trade before registration. Registration will only occur in case both entities accept the trade.

This Instruction establishes MEFF's supervision criteria.

To cater with this principle, MEFF defines, in Chapter 2 of this Instruction, a range for prices called Reference Parameters. If the trade, for which registration has been requested, falls within the Reference Parameters, MEFF will directly accept the transaction. If the trade, for which registration has been requested, is outside the Reference Parameters, MEFF will review the transaction, according to section 2 of this Instruction, in order to accept or reject the Agreed Trade.

## 2. REFERENCE PARAMETERS

The price parameters are as follows:

CONTRACT	PRICE RANGE WITH RESPECT TO LAST REFERENCE PRICE
Annual	+/-20%
Quarterly	+/-20%
Monthly	+/-30%
Daily and Weekly	+/-100%

MEFF will establish the reference price for each of the contracts at 8:00, 11:00, 14:00 and 17:00 CET.

In order to establish the reference prices, MEFF will observe external sources that are market benchmarks. If there are no updated reference prices, MEFF's closing price of the previous session or that which can be deduced from the evolution of market prices during that session will be taken as the reference price.

## 3. OPERATING PROCEDURE

The required data for sending a Pre-arranged Trade to the system for further confirmation and registration are:

- Contract
- Price
- Volume
- Buyer Member
- Seller Member

Requests for registration of these transactions will be communicated to MEFF's electronic system S/MART by a type "H" transaction or a type "S" when it comes from a

Volume Auction, reporting the data of the specific transaction intended to be registered, the volume and price (to two decimal places) of the trade and data of the counterparties.

One of the Members participating in the transaction may communicate it, in which case the other Member participating in the operation will have to confirm or, alternatively, a broker may communicate the transaction, in which case the participating Members must specifically confirm it.

The transaction may be confirmed by the Members, alternatively:

- a) Via a MEFF terminal.
- b) Via MEFF´s web portal (“MEFF Trade Entry Website”);
- c) Via a telephone call or electronic mail to the Supervision´s Services Department;
- d) Via a Broker, providing a signed written consent sent to MEFF as per the Annex to this Instruction. This signed written consent will authorise MEFF to consider confirmed, to all effects, all transactions from a given Member which the corresponding Broker submits to MEFF for clearing and settlement. Those transactions will be registered in the Member´s name without MEFF requiring a subsequent confirmation from the Member.

If the counterparty rejects the transaction or fails to confirm it within the session, MEFF will reject the registration request.

Should the Members who are counterparty to the transaction accept such transaction and supervision criteria comply with the previously stated requirements; MEFF will register it and communicate to BME CLEARING for the immediate processing at the CCP. BME CLEARING could supervise the trade according with the established criteria in the “Transactions directly agreed between Energy Segment Members and Brokered Transactions” Circular.

Once MEFF and BME CLEARING accept the trade, it will be registered at MEFF and immediately at BME CLEARING for clearing and settlement, acting BME CLEARING since that moment as the counterparty.

In case that MEFF or BME CLEARING does not accept the trade, it will be rejected.

For the prearranged trades that may require to be traded through a volume auction, this one will start at the predetermined price in the prearranged trade, in which any market member will be able to introduce buy and/or sell orders at the price set on the auction. After a determined time (that it is set further in this Instruction), the resulting transactions of the auction will be registered as a type "S" trade and the volume auction will be cancelled.

In the event that any of the counterparties or the broker requests the cancellation of a pre-arranged trade, sent to the system and confirmed by the counterparties, MEFF's Supervision Department will confirm said cancellation with the counterparts and proceed to its cancellation as long as the contract is still alive in the system.

#### 4. VOLUME AUCTION DURATION

The volume auctions will have a length of 30 seconds since its creation up to its cancellation. During this period, introduction and management of orders is available until the 30 seconds are completed, when all the non-executed orders get cancelled.

#### 5. PRE-ARRANGED TRADES DISCLOSURE

MEFF offers the possibility of pre-arranged trade deferral always under request, of the trade petitioner and if the following conditions are met:

- The trade does not come from a Volume Auction.
- If the trade is on a contract considered as liquid by ESMA: trade volume must represent a nominal greater than the thresholds published by ESMA (Large in Scale, LIS, post negotiation) for each asset class and underlying.
- For contracts considered liquid any volume can be accepted.

Non-disclosure consists in that the only public data at the end of the session will be the cumulative traded volume and the open position. All trade details will be made public two working days after the trade.

## ANNEX

..... (here forth  
"Member of MEFF") operates regularly in the energy products segment via one or several  
brokers, trading power derivatives.

BME CLEARING offers clearing and settlement services over transactions on power  
derivatives executed by Members of MEFF.

According to Instruction "*Transactions directly agreed between Market Members and  
Brokered Transactions*", in order for MEFF to register transactions at BME CLEARING for  
clearing and settlement, those Members who have executed the transactions must  
confirm them. The aforementioned Instruction details in section three the possibility for  
Members to confirm transactions via a broker providing a signed written consent from  
the Member to MEFF, where the Member authorizes MEFF to consider confirmed all  
transactions of this Member which the corresponding Broker submits to MEFF, without  
prejudice of the Member's right to communicate possible errors incurred by the broker  
for their correction, according to what is stipulated in section 3 of the above mentioned  
Instruction.

By sending and signing this written consent, the Member.....  
authorises MEFF to consider confirmed all transactions of the Member which  
..... (The Broker<sup>1</sup>) may submit to MEFF for its  
clearing and settlement at BME CLEARING. These transactions will be registered under  
the Member's name, without MEFF requiring a subsequent confirmation from him.

---

<sup>1</sup> A signed written consent form will be requested for each broker.
