

NOTICE 05/22

Date: 15 de February de 2022

Subject: Installation schedule New SMART version

As a continuation of the 01/22 Notice 13 January 2022 and 03/22 from last 11 February 2022, we inform you about the the rest of the dates affected by the new SMART version installation schedule.

Due to the updates that come with this new version, incompatibility is declared with Clearing terminals of Financial Derivatives, therefore after the 27 April terminals with version previous to 11.20 will not be able to connect to the Clearing segment C2.

Version availability calendar:

- **28 March 2022:** Beginning of automatic installation of Terminals, MeffGate and MeffServer in Production.
- **26/27 April 2022:** Changes in the files generated on the SFTP will be effective.
- **27 April 2022:** incompatibility is declared with Clearing terminals of Financial Dertivatives with version previous to 11.20.

We remind you that from last 11 February it is available for download on the MEFF website the new version of terminal 11.20.16 in the Production Environment, in the following link: <https://software.grupobme.es/meff>

User: meff

Password: software23

This new version comes with important changes in existing and new files. The last changes are included on the Release Note attached. The related documentation is available on the website.

The specifications of the FIX API T5.13 and M5.13 available with this version of SMART can be found in the following link: <https://www.meff.es/ing/Technology/Technical-documentation> (section: Upcoming version). The current FIX APIs will not be affected.
