

NOTICE

MEFF 37/2025

Reminder of the integration of the Power (M7) and Financial Derivatives (M3) segments into a unique Central Host for MEFFStation connections. **UAT.**

Centralization of connections in new Gateways

MEFF

8 August 2025

As stated in notice 25/36, published on August 12, 2025, the integration of the Energy Derivatives (M7) and Financial Derivatives (M3) segments into a single Central Host for MEFFStation connections in the Training environment will be carried out.

In our commitment to continue providing the best possible service, MEFF is updating the infrastructure that supports the Derivatives segments. For MEFFStation connections, the Power (M7) and Financial Derivatives (M3) trading segments are going to be integrated in a unique Central Host and subsequently the FIX connections will be centralized in the new Gateways.

In a first instance, this integration is going to be carried out in **UAT** and lately in the Production environment (the date will be announced well in advance).

As part of these improvements, the transition will take place in two phases:

Phase 1 – Integration of the Power (M7) and Financial Derivatives (M3) trading segments in a unique central Host for MEFFStation terminals: Starting **September 15**, there will be a change in the connections used by terminals with the MeffStation application installed, in a way that the M7 data will be received through a unique connection to M3. This change does not affect FIX and binary connections (public or private) or the connections to the xRolling FX Derivatives trading segment (MD) that will continue to operate independently.

Phase 2 – Centralization of connections in new Gateways: **On October 31, the current servers used in UAT will be discontinued**, both for MeffStation terminal connections and for public and private FIX connections. All connections must be centralized in the following Gateways:

- **10.166.34.24** (NAT: 152.100.0.45 if connecting via BT).
- **10.166.34.25** (NAT: 152.100.0.46 if connecting via BT).

This latest change can be made from September 15 to October 31.

The September 12 will be declared a holiday in UAT to allow for the necessary modifications.

In Annex I it is informed of the modifications that need to be made in the MeffStation Test terminals. In Annex II it is described the changes to be made in the FIX connections.

Sensitivity: C1 Public

ANNEX I: Modification in MeffStation (15 September)

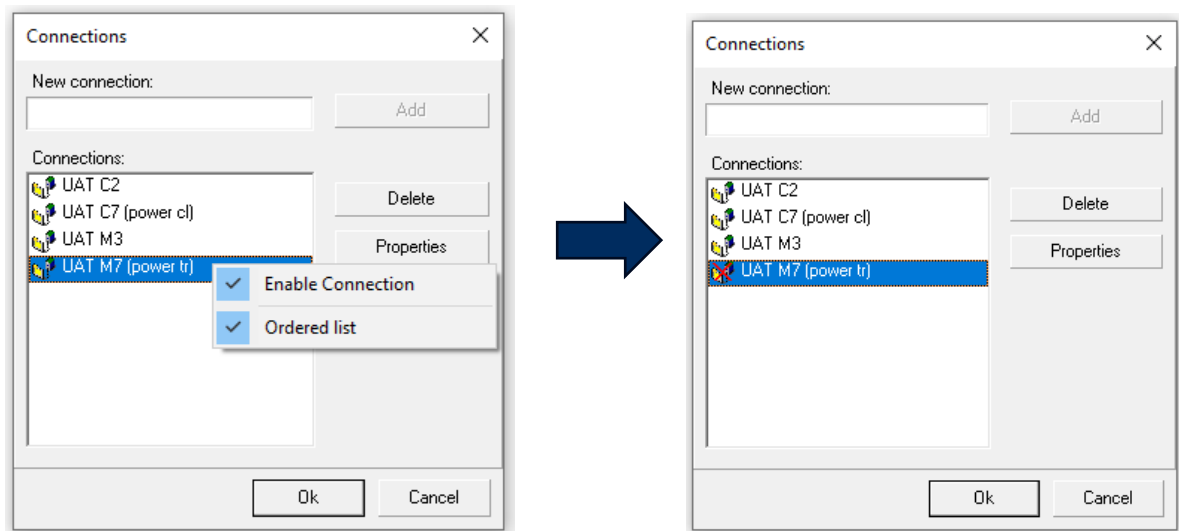

The modifications to be made in the MeffStation terminal only affects to the ones receiving simultaneously M7 and M3 data.

Modifications of connections

1.- Start the application and, **without** connecting to the market, go to the drop-down menu: Configure → Communications...

2.- From Connections, disable the **UAT M7** connection. Right-click on the segment to be disabled and select "Activate connection" to deactivate it.

3.- Accept and connect to the Market.

From that moment on, the M7 segment will be received through the M3 connection.

Modification of destination servers

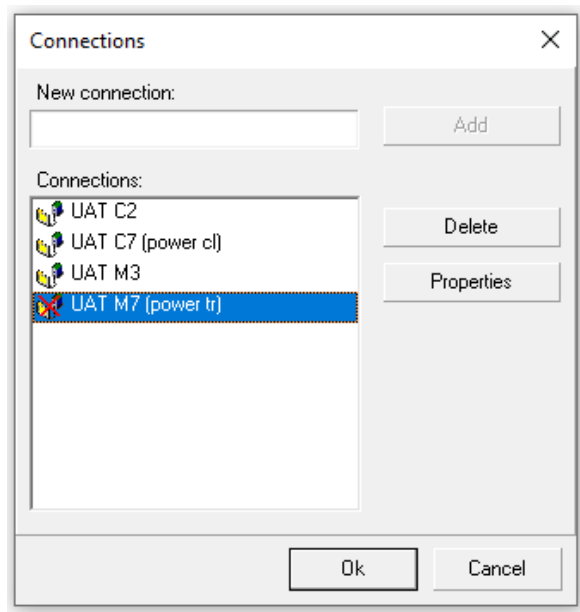

To modify the destination servers to the new Gateways, the hosts being connected to need to be updated. Before doing so, please check with your Communications department that the new servers are accessible through the M3 port (8001).

1.- Start the application and, without connecting to the market, go to the drop-down menu: Configure → Communications...

MEFF Sociedad Rectora del Mercado de Productos Derivados, S.A.U., con domicilio social en Madrid, Plaza de la Lealtad 1, CIF A-86595568, e inscrita en el Registro Mercantil de Madrid en el Tomo 30.460, Folio 151, Sección 8, Hoja M-548163.

2.- Change the destination servers for the **UAT M3** connection based on the connection path, removing the old ones and adding the new ones.

- If the host addresses are:

Current IP	To be changed by
10.166.34.85	10.166.34.24
10.181.34.85	10.166.34.25

- If the host addresses are:

Current IP	To be changed by
75.96.238.244	152.100.0.45
75.96.247.101	152.100.0.46

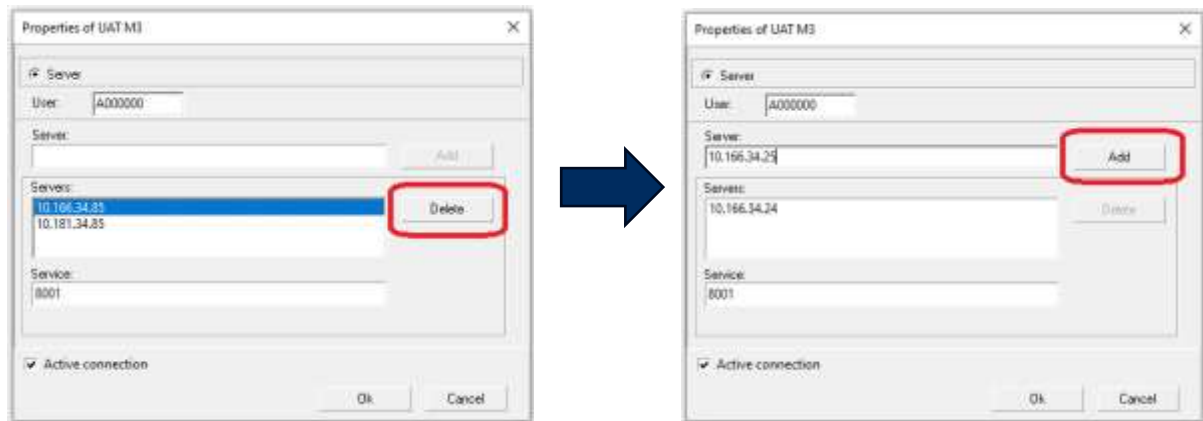

Double-click on the **UAT M3** connection to change the servers, removing the old ones and adding the new ones.

ANNEX II: FIX Connections

Following the process of updating the UAT servers, in FIX **only** the servers each segment connects to are modified, so all these connections must be migrated to the new servers.

- **IP addresses of the new servers:**

Dedicated lines

Server A	Server B
10.166.34.24	10.166.34.25

BT Radianz, London HUB

Server A	Server B
152.100.0.45	152.100.0.46

VPN

Server A	Server B
193.110.154.223	193.110.154.233

- **Ports:**

Segment	Public P.	Private P.
M3	8301	8501
M7 (Power trading)	8371	8571
MD (Forex trading)	8355	8555
