

ALGORITHM TEST CERTIFICATION **(to be sent by the Market Member to the Trading Venue)**

In accordance with "DELEGATED REGULATION 2017/584 OF THE COMMISSION of 14 July 2016 and its article 10," Evidence of members' algorithms to avoid anomalies in trading conditions", it is a requirement that market members certify that the algorithms they use for trading on the trading venues have passed the tests specified for the purpose.

For this purpose, a UAT environment with test securities, completely separated from the production environment will be provided by the trading venue, so that, the members could certify their algorithms behavior for the aforementioned purposes.

Once the tests have been carried out, the member of the market will send the following certification to: meffmarketservices@grupobme.es

In _____, _____ of _____ of 202

Ms./Mr
as (position)
into the Member of the Market (name of the Member)

CERTIFY we have carried out the necessary tests to verify the correct behavior and functionality of all our trading algorithms, which are listed below (indicate the internal name/codification of the algorithms):

being the result of such tests satisfactory.

Date, signature and Seal of the entity
