	Contract group:	Energy Derivatives
	Date:	27 January 2022
	Effective Day:	28 January 2022
	Replaces:	I-EX-ENE-02/2019
Subject	Pre-arranged Trades or Block Trades.	
Summary	This Instruction sets out the principles applicable to acceptance of Pre-arranged Trades or Block Trades, the operating procedure and the timetable. It is modified due to the introduction of the Volume Auctions as a new modality of the prearranged trades.	

1. PRINCIPLES FOR THE ACCEPTANCE OF PRE-ARRANGED TRADE

The basic principle governing the acceptance of Prearranged Trades is that its price is a market price. In the event that the Prearranged trade is on a liquid contract, it has a volume that is below the thresholds established by ESMA for that contract, and none of the counterparties reduce risk with the trade, the trade will be carried out through the Volume Action modality.

The thresholds established by ESMA are the so-called Large in Scale (LIS-PRE-TRADING), defined by asset class and underlying class in nominal.

MEFF and BME CLEARING will supervise any trade before registration. Registration will only occur in case both entities accept the trade.

This Instruction establishes MEFF's supervision criteria.

To cater with this principle, MEFF defines, in Chapter 2 of this Instruction, a range for prices called Reference Parameters. If the trade, for which registration has been requested, falls within the Reference Parameters, MEFF will directly accept the transaction. If the trade, for which registration has been requested, is outside the Reference Parameters, MEFF will review the transaction, according to section 2 of this Instruction, in order to accept or reject the Agreed Trade.

2. REFERENCE PARAMETERS

The price parameters are as follows:

Contract	Price range compared with the previous day's closing price
Annual	+/-7%
Quarterly	+/-10%
Monthly	+/-12%
Daily and Weekly	+/-100%

Exceptionally, the Session Supervisor may allow the trade registration outside the above table ranges when the trade price is a market price given by the evolution of the prices of that particular day. In these cases, the Market Price sources used by the Session Supervisor will be the previous pre-arranged trades accepted by MEFF and OTC market cross trades.

3. OPERATING PROCEDURE

The required data for sending a Pre-arranged Trade to the system for further confirmation and registration are:

- Contract
- Price
- Volume
- Buyer Member
- Seller Member

Requests for registration of these transactions will be communicated to MEFF's electronic system S/MART by a type "H" transaction or a type "S" when it comes from a Volume Auction, reporting the data of the specific transaction intended to be registered, the volume and price (to two decimal places) of the trade and data of the counterparties.

One of the Members participating in the transaction may communicate it, in which case the other Member participating in the operation will have to confirm or, alternatively, a broker may communicate the transaction, in which case the participating Members must specifically confirm it.

The transaction may be confirmed by the Members, alternatively:

- a) Via a MEFF terminal.
- b) Via MEFF's web portal ("MEFF Trade Entry Website");
- c) Via a telephone call or electronic mail to the Supervision's Services Department;
- d) Via a Broker, providing a signed written consent sent to MEFF as per the Annex to this Instruction. This signed written consent will authorise MEFF to consider confirmed, to all effects, all transactions from a given Member which the corresponding Broker submits to MEFF for clearing and settlement. Those transactions will be registered in the Member's name without MEFF requiring a subsequent confirmation from the Member.

If the counterparty rejects the transaction or fails to confirm it within the session, MEFF will reject the registration request.

Should the Members who are counterparty to the transaction accept such transaction and supervision criteria comply with the previously stated requirements; MEFF will register it and communicate to BME CLEARING for the immediate processing at the CCP. BME CLEARING could supervise the trade according with the established criteria in the "Transactions directly agreed between Energy Segment Members and Brokered Transactions" Circular.

Once MEFF and BME CLEARING accept the trade, it will be registered at MEFF and immediately at BME CLEARING for clearing and settlement, acting BME CLEARING since that moment as the counterparty.

In case that MEFF or BME CLEARING does not accept the trade, it will be rejected.

For the prearranged trades that may require to be traded through a volume auction, this one will start at the predetermined price in the prearranged trade, in which any market member will be able to introduce buy and/or sell orders at the price set on the auction. After a determined time (that it is set further in this Instruction), the resulting transactions of the auction will be registered as a type "S" trade and the volume auction will be cancelled.

In the event that any of the counterparties or the broker requests the cancellation of a pre-arranged trade, sent to the system and confirmed by the counterparties, MEFF's Supervision Department will confirm said cancellation with the counterparts and proceed to its cancellation as long as the contract is still alive in the system.

4. VOLUME AUCTION DURATION

The volume auctions will have a length of 30 seconds since its creation up to its cancellation. During this period, introduction and management of orders is available until the 30 seconds are completed, when all the non-executed orders get cancelled.

5. PRE-ARRANGED TRADES DISCLOSURE

MEFF offers the possibility of pre-arranged trade deferral always under request, of the trade petitioner and if the following conditions are met:

- The trade does not come from a Volume Auction.
- If the trade is on a contract considered as liquid by ESMA: trade volume must represent a nominal greater than the thresholds published by ESMA (Large in Scale, LIS, post negotiation) for each asset class and underlying.
- For contracts considered liquid any volume can be accepted.

Non-disclosure consists in that the only public data at the end of the session will be the cumulative traded volume and the open position. All trade details will be made public two working days after the trade.

6. REGISTRATION CALENDAR

The calendar for Registration of Pre-arranged trades for Members of the Power Derivatives Contract Group will be established in the "Trading Calendar for Power Contracts Group" Circular.

7. TIMETABLE

The timetable for requesting and registration of Pre-arranged Trades will be as established in Circular “Timetable for the Power Contract Group”. Any request for a Block Trade sent which remains pending acceptance outside said timetable will be cancelled by the system.

ANNEX

..... (here forth
“Member of MEFF”) operates regularly in the energy products segment via one or several
brokers, trading power derivatives.

BME CLEARING offers clearing and settlement services over transactions on power
derivatives executed by Members of MEFF.

According to Instruction “*Transactions directly agreed between Market Members and
Brokered Transactions*”, in order for MEFF to register transactions at BME CLEARING for
clearing and settlement, those Members who have executed the transactions must confirm
them. The aforementioned Instruction details in section three the possibility for Members
to confirm transactions via a broker providing a signed written consent from the Member to
MEFF, where the Member authorizes MEFF to consider confirmed all transactions of this
Member which the corresponding Broker submits to MEFF, without prejudice of the
Member’s right to communicate possible errors incurred by the broker for their correction,
according to what is stipulated in section 3 of the above mentioned Instruction.

By sending and signing this written consent, the Member.....
authorises MEFF to consider confirmed all transactions of the Member which
..... (The Broker¹) may submit to MEFF for
its clearing and settlement at BME CLEARING. These transactions will be registered under
the Member’s name, without MEFF requiring a subsequent confirmation from him.

¹ A signed written consent form will be requested for each broker.
